

FLEXIBLE BOLLARDS

IMPACT-RESISTANT SURFACE-MOUNT VEHICLE GUIDANCE BOLLARDS

FLEX ON IMPACT | RETURN UPRIGHT | REDUCE REPLACEMENT COSTS

DESIGNED TO FLEX - BUILT FOR HIGH-TRAFFIC AREAS

Flexible bollards provide a rigid bollard appearance while allowing the post to deflect when contacted by a vehicle and return toward its original position.

IMPACT FLEXIBILITY

SPRING MECHANISM

SURFACE MOUNT

KEY BENEFITS

- Flexible spring design deflects on impact
- Helps reduce bent-post replacement costs
- Rigid bollard appearance for vehicle guidance
- Simple surface-mount installation
- Suitable for concrete and prepared surfaces
- High-visibility covers / finishes available

TYPICAL APPLICATIONS

- Parking areas and parking structures
- Retail and commercial properties
- Restaurants and drive-through lanes
- Car washes and service facilities
- Hotels, hospitals and public facilities
- Loading areas and traffic guidance zones

Flexible bollards are intended primarily for traffic guidance and low-speed incidental impact applications; they are not crash-rated security bollards.
